

Intelligent Super-Fast-Charger

Easy handling, high accuracy and more power up to 600mA

AccuPower Fast-Charger for digicam, camcorder rechargeable Lithium-Ionen (Li-ion) and Lithium-Polymer (Li-Po) batteries with 3,6 - 7,4 Volt

Functions:

- Fast charging from 30 min
- charge more than 5000 different batteries, because of exchangeable adapters
- charge Lithium-Ionen (Li-Ion) and Lithium Polymer (LiPo) batteries with 3,6-7,4Volt (1S/2S)
- two LED Status indication
- automatic regulation on battery Voltage
- batteries state of the art microcontroller
- **Identification of defective batteries (short-circuit)**
- **Protection:** overcharge and wrong polarity
- more than 100 adapters are available

In the package:

- Charger Panther5
- Power supply
- Car Adapter
- User Manual

Exchangeable adapters:

Thanks to the interchangeable adapters, **more than 5,000 different electronic devices** can be charged. Over 100 different types of adapters are available. You can exchange the charge plane, so you only need one charger for different batteries

Panther 5 is suitable for almost 100% of digicam and camcorder batteries.

Technical details:

Input Voltage: 100-240 VAC

Charging current: 600mA

Charger for LiIon/LiPo

Weight: 79 gramm
